

Fuse Block

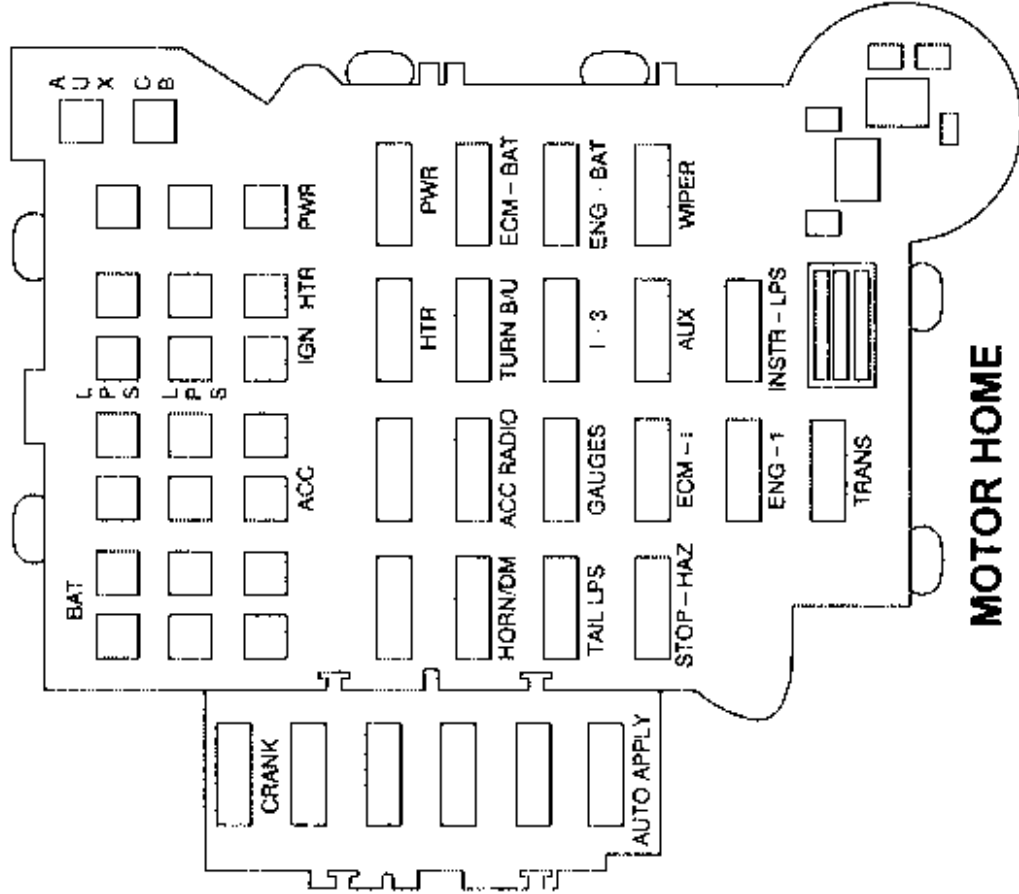

The fuse block is mounted by the body manufacturer.

You can remove fuses with a fuse extractor.

Be sure to use the correct fuse. If you ever have a problem on the road and don't have a spare fuse, you can borrow one of the correct value. Just pick some feature of your vehicle that you can get along without and use its fuse. Replace it as soon as you can. See "Fuses and Circuit Breakers" in this section.
